

LARRY I. SABELLINA
Vice President, Small Power Utilities Group
National Power Corporation

On March 30, 2021, Mr. Larry I. Sabellina was appointed by the National Power Board to lead the Small Power Utilities Group (SPUG) effective April 5, 2021.

Mr. Sabellina is a native of Misamis Oriental in northern Mindanao. This is where he finished his primary and secondary education. He took up and finished Bachelor of Science in Mechanical Engineering at Mindanao State University in 1988 and consequently passed the board exam on the same year.

He began his career with NPC in 1992 as Junior Engineer. From his hometown in Mindanao, he had to transfer to his place of assignment in Palawan. He has not only learned to adapt to a new home but also took every opportunity to learn about diesel operation, its repair and maintenance.

For his dedication, hard work and natural apt for learning, he made significant strides in his career until he was assigned to head the whole of Palawan Operations as its Division Manager on December 1, 2015. He was instrumental in expediting the establishment of new power facilities in the province through an amenable agreement with the Provincial Government of Palawan.

On July 22, 2019, his proactive leadership and management skills have made him Department Manager for SPUG's Luzon Operations Department.

With SPUG being at the frontline of service of NPC, Sir Larry surely has huge responsibilities on his shoulders. These are both challenging and exciting which happens to be the same combination of elements that made him stay at the corporation for 28 years now. ■
